1. Profile Description

Euromind is an international training and education centre specialising in the comprehensive organisation of internships for VET mobilities and educational programmes for school and adult group and short-term mobilities.

Euromind also delivers job shadowing and courses for teachers from across the European Union in cooperation with its sister company idevelop Training (www.ideveloptraining.com).

Euromind has been operating in the European market since 2011 and employs around 60 people. The company's headquarters is located in Seville, Andalusia, south of Spain. Offices are located in 2 towns in Spain: Seville, Málaga, and one in Portugal: Setúbal. The company stands out for its great experience in organising training programmes.

As an active partner, it has supported more than 450 vocational training institutions in the preparation and implementation of mobility programmes.

More than 9,000 vocational and technical school pupils, students, graduates, unemployed people and employees have benefited from euromind's services over the years. A full list of projects with numbers and titles can be found on the euromind website, www.euromind.es under Past Projects. It should be noted that this list is constantly being updated.

Participant Name	Participant Profile	Host Organization
Zofia Rechtziegel	Assisting with cooking tasks	Taberna Almazara S.L.
SZYMON TRZCIŃSKI	General mechatronics work	Meupe - Mecanizados Eugenio Peña S.L.

IGOR TRACZYK	Providing touristic services (guiding, sales, booking)	Sevilla Tours - Calle Alvarez Quintero - Vania Sainz Mijanes
ZUZANNA KOLEC	Providing touristic services (guiding, sales, booking)	Sevilla Tours - Calle Alvarez Quintero - Vania Sainz Mijanes
NATALIA ZARĘBA	Assisting with cooking tasks	Taberna Almazara S.L.
DAWID WÓJCIK	Carpentry and joinery work	Marino de la Fuente Sur S.A.
WOJCIECH WÓJCIK	Carpentry and joinery work	Marino de la Fuente Sur S.A.

Host Organization: Taberna Almazara S.L.

Address: Calle Afán de Ribera 177

Tutor's name: Benjamin Moreno

1. Description of the host organization

Taberna Almazara S.L. is a restaurant known for its traditional Spanish tapas and desserts. It serves lunch and dinner dishes based on meat, fish, seafood and vegetables. Among the restaurant's specialities are: prawn rolls, sirloin steak, croquettes, pork cheeks and salmorejo and some vegetarian options such as risotto and goats cheese au gratin.

2. Main responsibilities & tasks carried out during the work placement

- Learning about typical Spanish cuisine and local specialties
- Performing skilled cooking and food preparation
- Assisting in coordinating food service activities to have meals prepared at the scheduled time
- Washing and drying kitchen pots/ utensils and ensuring their proper storage
- Observing and testing food to determine if it has been cooked sufficiently, using methods such as tasting, smelling or piercing it with utensils
- Weighing, measuring and mixing ingredients according to recipes or personal judgment, using various kitchen utensils and equipment
- Arranging the working space in the kitchen
- Preparing the ingredients for consumption or cooking
- Washing, peeling, cutting and peeling fruit and vegetables as well as cutting meat
- Checking the quality of food by tasting it or using appropriate kitchen utensils

3. Tutor's final note

6

4. Participant's opinion about their personal & professional development

During my internship at Taberna Almazara in Seville, I helped with basic food preparation, supported the kitchen staff, and took care of cleanliness and order in the workplace. I learned how a Spanish restaurant works on a daily basis, improved my teamwork skills, and gained experience in food preparation and hygiene standards. The positive aspects of my internship were gaining practical experience, learning about Spanish cuisine, and working in an international environment. The negative aspects included initial language barriers and adapting to a new workplace. My internship in Seville was a valuable experience that helped me develop both professional and personal skills. Despite some challenges, it was a positive and educational experience.

Host Organization: Meupe - Mecanizados Eugenio Peña S.L.

Address: Calle Materos 1

Tutor's name: Daniel Rico Pérez

1. Description of the host organization

Meupe (Mecanizados Eugenio Peña S.L.) is a company specializing in precision machining for the aeronautical sector; it also covers the automotive and medical sectors. The company deals with services in an integral way, through the linear development of the product in the Meupe plant: from the purchase of the raw material, manufacturing of the part, heat treatment, and final processes to the final delivery to the customer. It specializes in the production of aeronautical mechanisms, offering the following services: precision machining of parts, certification and manufacturing of aeronautical standards, production of aeronautical mechanisms, assembly of components and equipment, and integral component management.

2. Main responsibilities & tasks carried out during the work placement

- Knowing different tools and materials, such as steel, iron, copper and bronze to make everyday and decorative objects
- Using traditional hand tools, such as hammers, punches, tongs, rataflex tops
- Wiring electric cabinets
- Mechanising electric cabinets
- Cutting metal sheets, tubes, electric cables
- Applying the final touches to the products
- Assembling the necessary machinery for producing electric cabinets

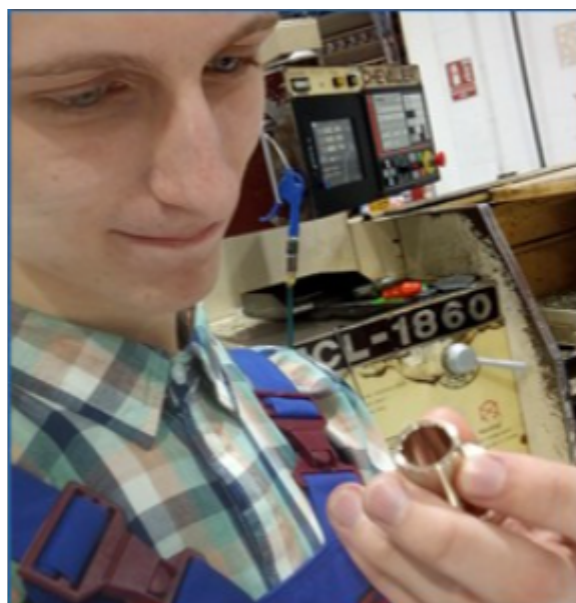

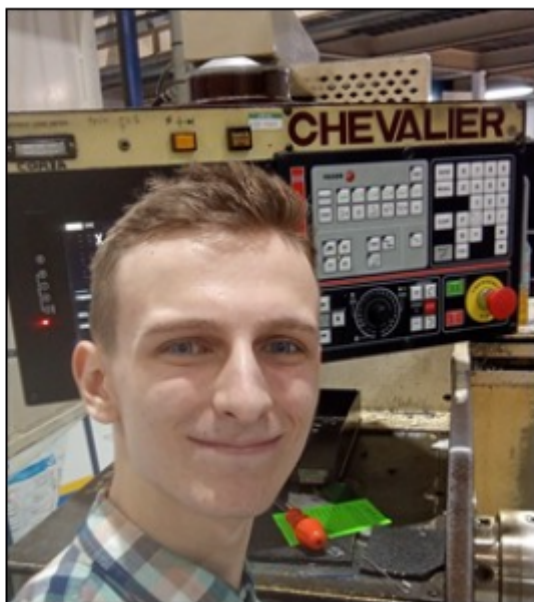

3. Tutor's final note

6

4. Participant's opinion about their personal & professional development

During my internship at Meupe in Spain, my tasks included the operation of CNC machines, verifying if produced parts matched technical drawing dimensions and the assembly of parts used in aeroplanes. I also had the opportunity to learn and observe G-code in use. I learned how to use and maintain CNC machines, gained practical experience in tasks like riveting and object measurement, and also gained exposure to working in a real part production facility. The positive aspects of my internship included gaining hands-on experience with CNC machines and tools used during part assembly, learning and seeing G-code in use, and working in a foreign environment filled with friendly people willing to help broaden my knowledge. Negative aspects included challenges in communication due to language barriers however they were overcome through language learning and tools such as google translate. My internship at Meupe in Seville helped me better understand how my future work environment could look. I gained hands-on experience with machines that I would be taking advantage of in the future. Overcoming challenges such as language barriers enhanced my problem-solving abilities. Overall, the internship helped me better reinforce and learn new technical skills, and experience what my profession does in real work place environment.

6. Pictures

Host Organization: Nube Soluciones Industriales - David Nuñez Benitez

Address: Calle Cuatro Naves 3-5-7 - Poligono Industrial Polysol

Tutor's name: David Nuñez Benitez

1. Description of the host organization

Nube Soluciones Industriales (David Nuñez Benitez) is a company offering technical solutions for industry. It offers laser cutting, plasma cutting, punching and milling of technical plastics, as well as adaptations, modifications to increase productivity and optimisation of all types of machines in the industrial sector, as well as their subsequent commissioning and validation.

2. Main responsibilities & tasks carried out during the work placement

- Knowing different tools and materials, such as steel, iron, copper and bronze to make everyday and decorative objects
- Using traditional hand tools, such as hammers, punches, tongs, rataflex tops
- Wiring electric cabinets
- Mechanising electric cabinets
- Cutting metal sheets, tubes, electric cables
- Applying the final touches to the products
- Assembling the necessary machinery for producing electric cabinets

3. Tutor's final note

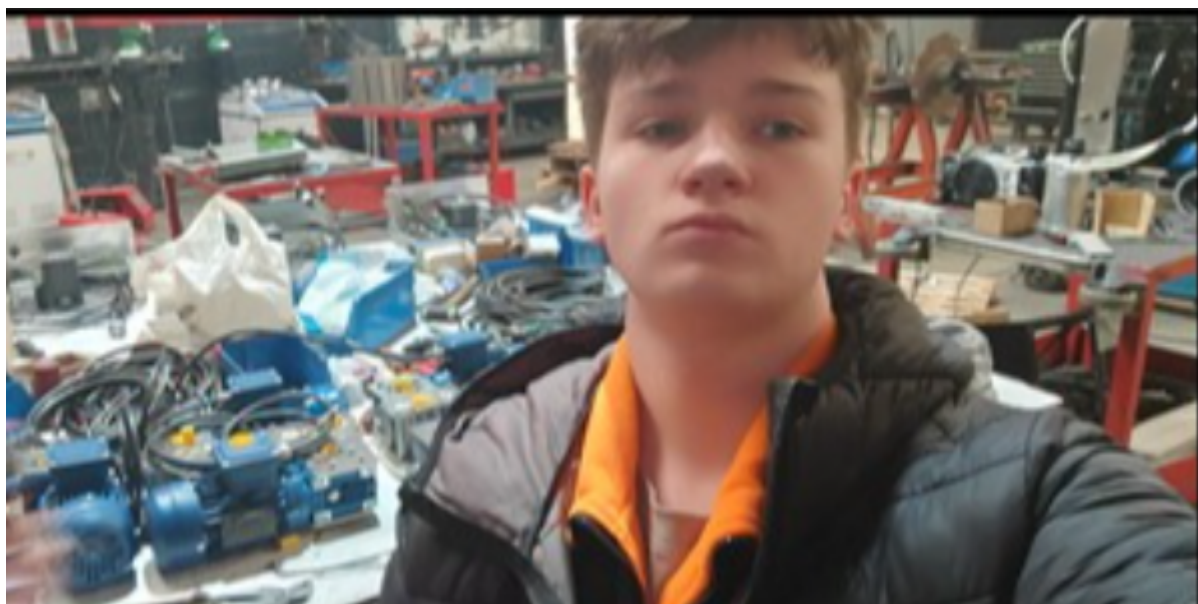

6

4. Participant's opinion about their personal & professional development

During my internship at Nube Soluciones Integrales, I was involved in the design, assembly, and testing of machines used for detecting leakages in pipeline systems. My responsibilities also included inspecting, testing and modifying electric motors, working with electrical wiring systems, and operating CNC machines. These tasks required a high level of technical accuracy, problem-solving skills, and close cooperation with experienced professionals in an industrial environment. Throughout the internship, I significantly enhanced my technical competencies in machine construction, pipeline leakage detection systems, electric motor diagnostics, electrical installations, and CNC machine operation. Moreover, I developed a deeper understanding of industrial workflows and safety procedures. Working in an international environment allowed me to improve my communication skills, adaptability, and confidence in professional interactions. The internship offered numerous advantages, including extensive hands-on experience with advanced industrial technologies, the opportunity to apply theoretical knowledge in practice, and the chance to collaborate with skilled specialists. A particularly positive aspect was the stay in Seville, a city that is not only exceptionally beautiful but also safe and culturally rich. Additionally, building strong relationships with peers and participating in joint excursions greatly enriched the overall experience. On the negative side, the quality of hotel food was occasionally unsatisfactory; however, this did not significantly affect the overall value of the internship. My internship at Nube Soluciones Integrales in Seville was a highly rewarding and formative experience. It enabled me to broaden both my technical expertise and interpersonal skills while working on real industrial projects. Over the course of the internship, I became more independent, responsible, and confident in my professional abilities. Living in Seville further enhanced this experience, as the city offers a unique combination of safety, cultural heritage, and aesthetic beauty. Overall, the internship contributed substantially to

my personal and professional development and confirmed my interest in pursuing a career in the technical and engineering field.

4. Participant's opinion about their personal & professional development

During my internship I was switching between many different assignments and tasks. I was helping with process of making mechanical elements and checking if they are within the tolerance. I learned how to use and operate cnc machines used in the industry. I also learned how to spot damaged mechanical elements. One of the better aspects of the internship was the option to polish my basic skills like measuring and use of different tools to do so. To negatives i would add that the work wasn't too mentally challenging and after some time it often boiled down to few repetitive motions. The internship was a good way of seeing how my industry operates in reality and although it might have not been too mentally demanding it was for sure.

4. Participant's opinion about their personal & professional development

During my internship at Nube, I was involved in practical technical work related to mechatronics and electromechanical systems. My tasks included assembling and testing electric motors and mechanical components, wiring and basic electrical connections, assisting in diagnostics of mechanical and electrical faults, and supporting ongoing workshop projects. I also worked with technical documentation and helped maintain order and safety in the workspace. During the internship, I improved my practical skills in assembling and servicing electromechanical components. I learned how to properly connect and test electric motors, use measuring tools, and follow technical drawings and instructions. I also gained experience working with industrial tools and machines, as well as a better understanding of workplace organization and safety standards in an industrial environment. Positive aspects of the internship included hands-on experience with real industrial equipment, learning from experienced technicians, and gaining insight into daily work in a Spanish technical company. The work environment was professional and supportive, which helped me develop both technical and practical skills. Negative aspects were mainly related to language barriers at the beginning of the internship, which sometimes made communication more difficult. However, this improved over time and did not significantly affect my learning process. The internship at Nube in Alcalá de Guadaira was a valuable experience that contributed significantly to my professional development. I was able to apply theoretical knowledge in practice and develop new technical skills. Working in an international environment helped me become more independent and confident in my abilities. Overall, the internship met my expectations and was an important step in my education and future career.

6

4. Participant's opinion about their personal & professional development

During my internship, I worked with metal processing machines. My duties included drilling holes in different materials, cutting materials to the required size, and organizing materials in the workshop. I also helped prepare materials for further work and maintained orders at my workplace. I learned how to process metal using industrial machines and how to safely perform tasks such as drilling and cutting materials. I also learned how important proper material organization is for efficient and safe work in the company. The positive aspects of my internship were gaining valuable practical experience, improving my technical skills, and learning how a workshop is organized. The only negative aspect was the language barrier, which sometimes made communication difficult. Overall, the internship was a very valuable experience for me. I gained important skills related to metal processing and workplace organization. Despite the language barrier, the internship helped me develop professionally and gain confidence in practical work.

3. Tutor's final note

6

4. Participant's opinion about their personal & professional development

During my internship, I was responsible for measuring metal parts and nuts for quality control. I had the opportunity to work in the metalworking department on CNC lathes and a CNC milling machine. I learned how to prepare materials for processing on a CNC lathe and CNC milling machine, as well as how to use the milling machine itself. I learned how to accurately take measurements with an electronic micrometer and electronic calliper. The positive aspect of the internship was changing positions every two days, which helped me improve my basic measurement skills. The negative was the initial language barrier. Overall, the internship was focused on improving existing skills such as taking measurements, but it also showed me my strengths and weaknesses, which will be quite useful for my career development

6. Pictures

Host Organization: Mecanizados PRECANIC SL

Address: Calle Polysol tres, Nave 15 - Poligono Insustrial Polysol

Tutor's name: Javier Sosa

1. Description of the host organization

Mecanizados PRECANIC S.L. is an industrial company operating in the machining and manufacturing sector for metal components. It specializes in the production, repair, and distribution of gears, transmission systems, and custom mechanical parts. It offers tailored solutions for industries such as automotive, industrial machinery, and technical maintenance. The company is known for its precision, high quality, and client-focused approach to complex mechanical projects.

2. Main responsibilities & tasks carried out during the work placement

- Knowing different tools and materials, such as steel, iron, copper and bronze to make everyday and decorative objects
- Using traditional hand tools, such as hammers, punches, tongs, rataflex tops
- Wiring electric cabinets
- Mechanising electric cabinets
- Cutting metal sheets, tubes, electric cables
- Applying the final touches to the products
- Assembling the necessary machinery for producing electric cabinets

3. Tutor's final note

6

4. Participant's opinion about their personal & professional development

During my internship abroad, I was involved in operating and learning how to use various industrial machines and technical systems. I participated in daily technical tasks, worked with modern equipment, and gained experience in real industrial working conditions. During the internship, I learned how to operate many different machines and devices used in industry and mechatronics. I gained practical knowledge about how they work, how to use them safely, and how they are applied in production processes. The positive aspects of my internship include gaining hands-on experience, developing technical skills, and working in an international environment. The main challenges were language barriers and adapting to a different work organization. Overall, the internship was a very valuable experience that helped me develop practical and technical skills. The knowledge and experience I gained better prepared me for further education and my future professional career.

Host Organization: IngeMark - Servicios Agrupados S.L.

Address: Calle Santa Cruz 22 - Polígono Industrial Los Girasoles

Tutor's name: David Benitez Fernandez

1. Description of the host organization

IngeMark (Servicios Agrupados S.L.) is a company specialized in the hydraulic engineering sector. It produces pressure equipment and sends it to any part of Spain and several countries in Europe, Africa and America. IngeMark manufactures different models of hydro-pneumatic pressure equipment, both health and fire, without limitation and respecting any regulations needed (Spanish, European, American, etc.). It produces water pumps, electric motors pumps, generators, control cabinets, electronic components, electrical parallax. The company is divided into 3 departments: Technical Department, Technical Assistance Department and Technical Training Department.

2. Main responsibilities & tasks carried out during the work placement

- Knowing different tools and materials, such as steel, iron, copper, and bronze to make every day and decorative objects
- Using traditional hand tools, such as hammers, punches, tongs, rata flex tops
- Wiring electrical cabinets
- Mechanizing electrical cabinets
- Cutting metal sheets, tubes, electric cables
- Applying final touches to the products
- Assembling necessary machinery for the production process of electrical cabinets

3. Tutor's final note

6

4. Participant's opinion about their personal & professional development

During my internship at IngeMark - Servicios Agrupados S.L. in a foreign country, my main tasks included assembling electrical control boxes and cutting different electrical components to the required sizes. I also assisted in preparing elements for installation and worked with basic workshop equipment during daily tasks. During the internship, I learned how to properly assemble electrical control boxes and gained practical skills in using various machines such as a grinder, a bench drill, and an angle grinder. This experience helped me better understand technical work and improved my manual and technical abilities. Positive aspects of the internship include gaining hands-on technical experience, learning how to use different machines, and having the opportunity to stay in Seville, which is a beautiful city, especially in the city center. Overall, I evaluate the internship trip positively because it allowed me to gain new practical skills and valuable work experience. It was a good experience and an important part of my personal and professional development.

4. Participant's opinion about their personal & professional development

During my internship, I was mainly involved in the construction and assembly of electrical enclosures. My tasks included preparing materials, drilling holes using a bench drill, grinding elements, and cutting materials with a table saw. I also participated in assembling components and performing basic workshop and installation tasks. During the internship, I learned many new skills related to the construction of electrical enclosures and workshop work. I gained practical experience in operating a bench drill, grinder, and table saw. I also learned the importance of precision, workplace safety when using machines, and proper organization of work while carrying out technical tasks. The positive aspects of my internship included gaining practical technical experience, working with professional tools, and learning teamwork. The internship helped me better understand the process of building electrical enclosures and working in an industrial environment. The negative aspects included initial difficulties in operating machines and the need to adapt to new working conditions. My internship was a very valuable experience that allowed me to develop both technical and manual skills. The knowledge I gained in electrical enclosure construction and the operation of workshop machines will be useful in my further education and future career. The internship also helped me increase my confidence and prepare for future professional challenges.

4. Participant's opinion about their personal & professional development

During my internship, I was involved in the construction and assembly of electrical enclosures, including installing components and preparing them for further use. I also worked with workshop tools such as a grinder, a drill press, and a table saw, which I used for processing and shaping different materials. Additionally, I learned how to organize my workstation and follow workplace safety rules. During my internship, I learned how to build and assemble electrical enclosures and how to select appropriate components for their construction. I gained practical experience in using a grinder, a drill press, and a table saw, as well as learning how to operate these machines safely. I also learned basic principles of working in a technical and industrial environment. Positive aspects of my internship include gaining hands-on experience, working with professional tools, and learning new technical skills. The internship helped me better understand how workshop work is organized and what responsibilities are involved. Negative aspects included initial difficulties in operating machines and the need for constant concentration due to safety requirements. Overall, the internship was a very valuable experience that allowed me to develop my technical and practical skills. The knowledge I gained in building electrical enclosures and operating workshop machines will be useful in my future career. I believe that the internship significantly expanded my skill set and prepared me better for professional work.

6

4. Participant's opinion about their personal & professional development

During my internship at TTDIE System, I worked as a mechatronics technician trainee. My tasks included cutting materials to required dimensions, operating a metal cutting machine under supervision, painting metal elements to achieve a protective, galvanized-like finish, cataloguing and organizing materials, cleaning and maintaining order in the workshop, assisting with carrying and transporting materials, and supporting basic workshop activities. All tasks were completed following safety rules and workplace procedures. During the internship, I learned how to safely operate industrial machines, handle and finish metal materials, and maintain organized workshop conditions. I gained practical experience in workflow coordination, teamwork, and problem-solving in a foreign environment. Additionally, I developed communication skills using translation tools due to language barriers. Positive aspects of my internship include gaining hands-on experience in a real industrial environment, improving my technical and organizational skills, learning to work with metal materials and machines, and developing adaptability and teamwork in a foreign workplace. Negative aspects include limited communication in English and some repetitive tasks that provided fewer opportunities for advanced technical learning. My internship at TTDIE System was a valuable experience that enhanced my professional development as a mechatronics technician. Despite challenges such as language barriers and repetitive tasks, I successfully completed all assigned responsibilities using cooperation and translation tools. The internship allowed me to understand real industrial workflows, improve my practical skills, and adapt to new environments. Overall, it was an important and enriching step in my education and career preparation.

Host Organization: Sevilla Tours - Calle Alvarez Quintero - Vania Sainz Mijanes

Address: Calle Álvarez Quintero 44

Tutor's name: Vania Sainz Mijanes

1. Description of the host organization

Sevilla Tours (Calle Alvarez Quintero - Vania Sainz Mijanes) offers a variety of unique and comfortable ways to explore the city. Segway tours, such as the Panoramic and Monumental Tour, allow you to visit the main points of interest. They also offer bike tours, guided walking tours, and private tours tailored to the client's preferences. Additionally, they provide combined experiences like the Monumental tour with a Guadalquivir river cruise or the "Unforgettable Seville with Flamenco" package. All services are designed to enjoy the city with flexibility and comfort.

2. Main responsibilities & tasks carried out during the work placement

- Searching new interesting information, stories about the city, locals or restaurants to go and activities to do
- Accompanying and helping a tourist guide during trips in Seville
- Writing a blog about the positive and negative impacts of tourism in Andalusia
- Analyzing the objectives of responsible tourism development at different companies (private, public and voluntary)
- Collaborating in the design of holiday packages incorporating principles of responsible tourism
- Assisting in the reinforcement of collaboration with other tourism companies in the city
- Collaborating in the development of tours in different points of the city
- Assisting in the reservation process, issuing tickets and vouchers and other relevant documents related to the services provided

4. Participant's opinion about their personal & professional development

During my internship at Sevilla Tours in Seville, I worked in a travel agency combined with a bike and segway rental service. My tasks included customer service, providing information about local attractions, selling tickets for tourist attractions such as flamenco shows and the Green Bus, and assisting with reservations. I also helped prepare and rent bicycles and segways, checked their technical condition, and participated in organizing and assisting during guided tours and excursions. During my internship, I learned how a travel agency operates on a daily basis. I gained practical experience in selling tickets for tourist attractions, organizing excursions, and working directly with tourists from different countries. I improved my communication skills in a foreign language and learned how to professionally advise clients on sightseeing options and attractions in Seville. The positive aspects of my internship include gaining hands-on experience in the tourism industry, improving my language skills, and learning how to work with international clients. I also enjoyed participating in excursions and seeing how they are organized in practice. A negative aspect was that sometimes communication was challenging due to language barriers, especially at the beginning of the internship. My internship at Sevilla Tours in Seville was a very valuable experience that allowed me to develop both professionally and personally. I gained practical knowledge related to tourism services, customer service, and excursion organization. Working in an international environment helped me become more confident and independent. Overall, the

internship met my expectations and significantly expanded my skills and experience in the tourism industry.

Host Organization: Sevilla Tours - Calle Alvarez Quintero - Vania Sainz Mijanes

Address: Calle Álvarez Quintero 44

Tutor's name: Vania Sainz Mijanes

1. Description of the host organization

Sevilla Tours (Calle Alvarez Quintero - Vania Sainz Mijanes) offers a variety of unique and comfortable ways to explore the city. Segway tours, such as the Panoramic and Monumental Tour, allow you to visit the main points of interest. They also offer bike tours, guided walking tours, and private tours tailored to the client's preferences. Additionally, they provide combined experiences like the Monumental tour with a Guadalquivir river cruise or the "Unforgettable Seville with Flamenco" package. All services are designed to enjoy the city with flexibility and comfort.

2. Main responsibilities & tasks carried out during the work placement

- Searching new interesting information, stories about the city, locals or restaurants to go and activities to do
- Accompanying and helping a tourist guide during trips in Seville
- Writing a blog about the positive and negative impacts of tourism in Andalusia
- Analyzing the objectives of responsible tourism development at different companies (private, public and voluntary)
- Collaborating in the design of holiday packages incorporating principles of responsible tourism
- Assisting in the reinforcement of collaboration with other tourism companies in the city
- Collaborating in the development of tours in different points of the city
- Assisting in the reservation process, issuing tickets and vouchers and other relevant documents related to the services provided

4. Participant's opinion about their personal & professional development

During my practice, I worked at a company in Seville called Sevilla Tours. My tasks included renting bicycles and Segways to customers, assisting clients with choosing suitable city attractions, and selling tickets for various tourist attractions available in the city. I also helped organize and support guided city tours conducted on bicycles and Segways in different languages. Additionally, I provided basic tourist information and customer service to ensure a positive experience for visitors. I learned how to work professionally with international customers from different countries, improved my communication skills in foreign languages, and gained practical experience in customer service. I also learned how to handle bicycle and Segway rentals, manage bookings and ticket sales, and assist in organizing guided city tours. Additionally, I developed better teamwork skills and learned how to work responsibly in a tourism-focused company. The internship had many positive aspects, such as working with international clients, which helped me improve my communication and language skills. I gained practical experience in customer service, learned how a tourism company operates, and developed teamwork and responsibility. However, during the low tourist season there were fewer customers, which sometimes limited the amount of daily work and experience gained. Overall, my internship in Seville was a very valuable experience. It allowed me to gain practical skills in customer service, tourism, and working with international clients. I improved my communication and language abilities, learned how a tourism company operates on a daily basis, and developed

responsibility and teamwork skills. Living and working in Seville also helped me become more independent and adaptable in a new environment. Despite the low tourist season at times, the internship was a positive and enriching experience that contributed to both my professional and personal development.

4. Participant's opinion about their personal & professional development

During my internship at Sevilla Tours, I worked in a company that specializes in the field of tourism. My tasks included selling tickets to local attractions in Seville, providing information to tourists, cleaning, maintaining, renting, and inspecting bikes and segways, paper work such as filling out documents and reservation forms, tracking daily income, and recording financial data accurately using programs such as Excel and Google Maps. I learned how to communicate with clients in a polite and professional way and how to correctly promote and sell tickets to popular attractions. I perfected my English and gained communication skills in Spanish. I also gained practical skills in upkeeping bikes and segways, I learned how to use computer programs such as Excel or Google Calendar. I also gained knowledge in organising and managing bike and segway tours with tourists. Positive aspects of my internship include gaining experience in the tourism industry, preparing me for future work opportunities. Learning how to work with clients of different ethnicities, cultures or languages and their customer service standards. I also enjoyed learning about the paperwork process and how to fill different contracts out. The negative aspects include, the language barrier between me and the clients at the beginning making it difficult to communicate effectively, and also a high workload that often requires handling several responsibilities at once, leading to some stress. My internship at Sevilla Tours was instrumental to my development in the field of tourism. I enjoyed gaining insight into the tourism industry and improving my customer service and communication

skills by working with international clients. I also learned the importance of teamwork and responsibility in a busy work environment. Overall, the internship was a valuable and positive experience.

Host Organization: Taberna Almazara S.L.

Address: Calle Afán de Ribera 177

Tutor's name: Benjamin Moreno

1. Description of the host organization

Taberna Almazara S.L. is a restaurant known for its traditional Spanish tapas and desserts. It serves lunch and dinner dishes based on meat, fish, seafood and vegetables. Among the restaurant's specialities are: prawn rolls, sirloin steak, croquettes, pork cheeks and salmorejo and some vegetarian options such as risotto and goats cheese au gratin.

2. Main responsibilities & tasks carried out during the work placement

- Learning about typical Spanish cuisine and local specialties
- Performing skilled cooking and food preparation
- Assisting in coordinating food service activities to have meals prepared at the scheduled time
- Washing and drying kitchen pots/ utensils and ensuring their proper storage
- Observing and testing food to determine if it has been cooked sufficiently, using methods such as tasting, smelling or piercing it with utensils
- Weighing, measuring and mixing ingredients according to recipes or personal judgment, using various kitchen utensils and equipment
- Arranging the working space in the kitchen
- Preparing the ingredients for consumption or cooking
- Washing, peeling, cutting and peeling fruit and vegetables as well as cutting meat
- Checking the quality of food by tasting it or using appropriate kitchen utensils

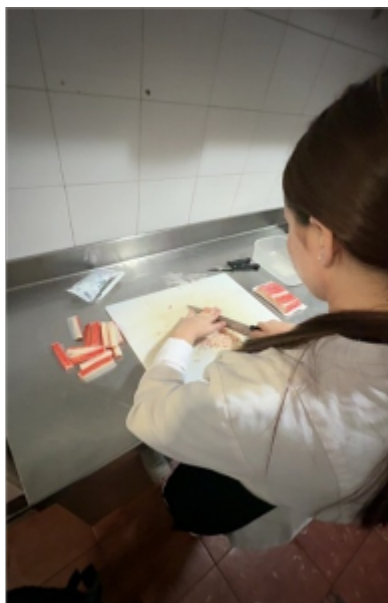

3. Tutor's final note

Host Organization: Marino de la Fuente Sur S.A.

Address: Calle Dos 64 - Polígono Industrial la Red

Tutor's name: Juan Manuel Gonzalez Fernandez

1. Description of the host organization

Marino de la Fuente Sur S. A. is a company active in the carpentry sector, engaged in the processing of all types of wood, such as wood for woodworking (pine, cedar, maple, oak), construction wood (impregnated and non-impregnated mouldings) and plywood (for indoor and outdoor use). The company also offers care and maintenance treatments to improve performance and extend the life of the wood, including: autoclaves for wood impregnation, organic substances to protect against insects, fungi and termites, and ISPM 15 treatment. The company can rely on a team of specialists who take care of the customer and help them select and design the products that best meet their needs.

2. Main responsibilities & tasks carried out during the work placement

- Supporting installation of wooden furniture and other carpentry elements
- Preparing the workplace and keeping it in order, preparing the necessary tools to work
- Selecting and using the tools, machines, and equipment necessary to perform the tasks assigned
- Using the measuring instruments and gauges
- Cutting materials with hand and electric tools, and assemble, cut or shape elements
- Reading plans and specifications to determine the dimensions, materials required and installation processes to be followed, etc.
- Assisting in the manufacture of wooden products
- Performing work related to the operation and maintenance of machinery and equipment used in carpentry
- Assisting in the repair, renovation, and maintenance of carpentry

4. Participant's opinion about their personal & professional development

During my internship at Marino de la Fuente in Seville, I worked in the production of wooden panels. My tasks included unloading wooden boards from pallets onto the conveyor belt leading to the machine, receiving finished wooden panels from production, and packing them into packages for further transport. I learned how the production and packing process of wooden panels works. I also improved my work organization and teamwork skills. The positive aspects were gaining practical experience in production work and working in an international environment. The negative aspect was the language barrier at the beginning. Overall, the internship in Seville was a very important experience for me. It allowed me to gain practical skills, better understand production work, and become more responsible and independent in my daily duties.

6. Pictures

1. Mobility project preparation & Induction

Before the participants arrived, Euromind provided them with a pre-arrival guide packed with essential information about local transportation, social activities, and emergency contacts. Additionally, Euromind organized online meetings to introduce themselves to the participants and conduct interviews. Following these interviews, a dedicated group on social media was established, facilitating ongoing communication between Euromind, the selected participants, and their accompanying teachers, fostering a sense of community even before their arrival in the host country.

Drawing upon a thorough evaluation of participants' CVs and interview outcomes, Euromind carefully matched each individual with suitable host organizations. Ensuring compliance with all necessary regulations, Euromind individually prepared Learning Agreements for each participant and ensured that all involved parties signed the required documents.

Upon the group's arrival, Euromind hosted a welcoming meeting where participants were introduced to the Euromind team and briefed on the program agenda, accommodation guidelines, and dissemination strategy options. Subsequently, the Euromind team accompanied participants to meet their designated mentors at the host organizations, acquainting them with their workplace environment.

To aid in their integration into the local community, participants were taken on a neighbourhood tour, familiarizing them with nearby amenities such as banks, post offices, supermarkets, and bus stations. This comprehensive approach aimed to facilitate participants' smooth transition and adaptation to their new surroundings.

2. Monitoring & Mentoring

To ensure the fulfillment of Learning Agreement objectives and the seamless integration of participants into work culture, monitoring was conducted collaboratively by all project stakeholders. Euromind designated a coordinator responsible for introducing participants to the host organization(s).

Throughout the program, mid-term and final monitoring and evaluations were conducted to review participant tasks, progress, and gauge satisfaction levels from both participants and host organizations. Following the mid-term evaluation, the coordinator met with participants to discuss the results. Any areas of concern were addressed privately to allow for open discussion and problem-solving.

Host organizations appointed staff members as tutors to assist, inform, guide, and supervise participant work. These tutors held regular meetings with participants to assess their presence, discuss tasks, and adjust responsibilities as needed based on company and participant requirements.

At the program's conclusion, during a farewell session, Euromind distributed evaluation sheets for participants to assess their experience in Spain, their work placements, and Euromind's performance. Euromind remained available to participants 24/7 for emergency assistance.

3. Communication

Euromind takes good care of successful communication between companies and trainees. Each evaluation of work is aimed at improving the quality of cooperation. Each party is thoroughly checked and assessed and the necessary improvements are introduced. Moreover, Euromind mediates in this supervisor-trainee collaboration by translating and solving language-connected complicated matters.

4. Dissemination strategy

Euromind actively participated in preparing and disseminating project results alongside the sending organization and participants. Throughout the mobility program, Euromind organized weekly one-hour meetings with participants to monitor their progress and ensure they gathered all necessary information regarding their work placements and stay in the host country. The materials produced by participants served as valuable tools for disseminating project results to all stakeholders involved.

Participants had the flexibility to work either individually or in groups. On the first day, they were required to decide on the method(s) they would use to document their professional experiences. Typically, the entire group created a Facebook page, recognized for its effectiveness and accessibility to a wide audience. This platform appealed particularly to young people, allowing them to share their experiences instantly.

Apart from the Facebook fan page, the trainees were encouraged to prepare a PowerPoint presentation in English which they would be able to use to disseminate the results of the project back home (conferences, meetings with other students, parents, etc.).

Euromind also disseminates the project at a local level. It organises language and cultural exchanges between the international trainees and students from local vocational colleges. During those meetings both Spanish and International students are involved in a number of activities the aim of which is to get to know each other, share experiences related to work experiences and in general their stay in Spain. The students also exchange information about their countries and cultures.

5. Certification

At the conclusion of their stay, participants received comprehensive validation of their acquired skills, knowledge, and competencies through various recognition methods, including:

- Training Certificate
- Europass Mobility Certificate
- Transcript of Records reflecting acquired learning outcomes
- Language Course Certificate, if applicable

1. Seville city walk with euromind

2. Project promotion (dissemination) meetings with euromind Coordinator (1 hour per week)

The primary aim of the dissemination meetings was to create materials that would serve as promotional tools for the project once participants returned to their home country. These meetings were held weekly and facilitated by the Euromind Coordinator, who played a crucial role in ensuring the success of the dissemination efforts. During each session, the Euromind Coordinator met with the participants to review their progress, address any challenges they encountered, and provide answers to their questions. This consistent support helped to maintain momentum and ensure that any obstacles were promptly resolved. The coordinator also monitored the development of the dissemination tools, ensuring that they met the project's standards and objectives.

3. Churros

During their Erasmus stay, the students participated in an engaging activity centered around the culinary tradition of churros, a quintessential Spanish delicacy renowned for its crispy exterior and soft interior. They were introduced to the meticulous process involved in crafting churros, which entails blending flour, oil, and sugar, followed by frying until achieving a golden hue and distinct star-like shape. Subsequently, the freshly prepared churros were served warm, often accompanied by a choice of chocolate or coffee. This amalgamation of churros tasting with a Spanish language lesson provided the students with a multifaceted educational experience, fostering cultural appreciation and facilitating language acquisition in a practical context.

4. Tapas Night

During their Erasmus stay in Spain, the group experienced the tradition of going out for tapas, indulging in local Spanish cuisine while bonding with the Euromind team. Tapas, small servings of food served with drinks, were enjoyed at a local bar, where the students savored Spanish delicacies and immersed themselves in the lively social atmosphere. The coordinator ensured reserved seating and assisted in selecting delicious food and drinks. This activity enhanced cultural understanding, built camaraderie, and improved language skills, fostering proficiency and confidence in communication. Additionally, students gained insight into Spanish dining customs and the importance of socializing in local culture, enriching their overall experience.

5. Tapas Night

During their Erasmus stay in Spain, the group experienced the tradition of going out for tapas, indulging in local Spanish cuisine while bonding with the Euromind team. Tapas, small servings of food served with drinks, were enjoyed at a local bar, where the students savored Spanish delicacies and immersed themselves in the lively social atmosphere. The coordinator ensured reserved seating and assisted in selecting delicious food and drinks. This activity enhanced cultural understanding, built camaraderie, and improved language skills, fostering proficiency and confidence in communication. Additionally, students gained insight into Spanish dining customs and the importance of socializing in local culture, enriching their overall experience.

6. Flamenco show + 1 drink in Auditorium Álvarez Quintero

The students had the unique opportunity to witness the magic of flamenco at the Auditorio Alvarez Quintero, a venue run by a family with deep roots in the flamenco tradition. Located between the iconic Seville Cathedral and City Hall, this cultural space provided an intimate setting for an hour-long performance that immersed the students in the vibrant world of flamenco. They watched passionate artists showcase a wide variety of flamenco styles, from soulful singing to fiery, rhythmic dancing, all accompanied by the distinct sound of traditional flamenco guitar. The raw emotion and energy of the performers captivated the students, offering them a profound insight into Andalusian culture and the expressive power of this celebrated Spanish art form.

7. Carmona 1/2 day (shuttle bus)

8. Cádiz (shuttle bus)

While in Cadiz, one of the oldest towns in the Iberian Peninsula, the students discovered its long history spanning over 3,000 years. Founded by the Phoenicians around 1100 BC, it has always been one of Spain's most important ports. They were amazed by the old town's wide squares, winding streets, and tall houses with towers, giving it a mysterious maritime feel. After exploring the Old City, the participants had a few hours to explore on their own and relax on the nearby pristine beaches. As they soaked up the sun, they enjoyed the fresh sea breeze and the sound of waves, fully immersing themselves in Cadiz's coastal beauty. The tranquil atmosphere and historic charm of Cadiz left a lasting impression on the students, making it a highlight of their journey through Spain.

9. Málaga (shuttle bus)

The students explored Málaga's rich history and vibrant culture, starting at Gibralfaro Castle. From its walls, they admired panoramic views of the city, harbor, and surrounding mountains. They then walked to the Alcazaba, a Moorish fortress with beautiful gardens and impressive architecture. Nearby, they visited the Roman Theatre, marveling at the ancient ruins. Next, they admired the Cathedral, known as "La Manquita" for its unfinished tower, appreciating its Renaissance and Gothic styles. Along Calle Larios, the main shopping street, they enjoyed lively shops and street performers. They ended at Muelle Uno, the modern waterfront, relaxing by the sea, tasting local food, and watching the sunset.

10. Córdoba (shuttle bus)

Córdoba, with its fascinating history from Roman times to being the Umayyad Caliphate's capital, intrigued the trainees. During its Islamic era, it was a hub for learning, drawing scholars from afar. They explored the city, once one of the world's busiest, known for its many libraries and schools. Despite mostly being Muslim, Córdoba welcomed Christians and Jews. They admired landmarks like The Great Mosque, now a cathedral, and The Alcázar of the Christian Monarchs. They also saw The Calahorra Tower and The Roman Bridge, soaking in the city's old charm. In their free time, they wandered through charming streets with flowers and Spanish souvenirs. The city definitely left a lasting impression on the trainees, enriching their understanding of Spain's vibrant history.

The Euromind team worked hard to provide the trainees with an exceptional professional and cultural experience. They were always available to offer support, guidance, and solutions to any challenges the trainees encountered.

The participants were highly satisfied with their professional training abroad, which provided them with valuable experience. It's expected that they will apply this experience in their current roles back home or use it to enhance their job prospects.

Additionally, the participants learned the basics of the host country's language and demonstrated their ability to thrive in a multicultural work environment, both independently and as part of a team.

The Euromind team was extremely pleased with the participants' engagement and enthusiasm throughout the project. Overall, the project was a great success, and we look forward to collaborating on future projects with Zespół Szkół w Czaplinku.

Sevilla, 31/01/2026

Carlos Hoyo de la Torre
